TO WHOMSOEVER IT MAY CONCERN,

This is to certify that Aakarsh Sasi interned at Laughing Buddha Technologies from 22nd October 2019 to 31st May 2020, remotely, with few periods of gap. In total, Aakarsh worked for nearly **3.5 months** (105 days) on the iOS app development of Tap In.

During the course of his internship, Aakarsh, as a first time iOS developer, displayed passion and enthusiasm for technology and iOS development, specifically. He tried to overcome many challenges that a first time developer is expected to face and didn't lose motivation in doing the same.

He was responsible for developing the company's iOS app. His work comprised of the following major features-

- Adding infinite scrolling support
- Caching of data for offline access using Core Data.
- Creating dynamic dark and light mode theme.
- Providing in-app youtube support.
- Integrating Social Oauth logins for Google, Facebook, Twitter and LinkedIn.
- Adding gesture control and navigation.
- Implementing WebView support inside the app.
- Added splash screen to the app on launch.
- Implemented comments and replies structure.
- Added input validation and error messages for a great user experience.

To us, Aakarsh came across as an excellent performer with a pleasant disposition. He is a good team player and takes initiative to learn new things. He will be an asset to any organisation he may choose to join. **If we could have it our way- we would've loved for Aakarsh to continue in a full time role with us.** As a full time undergrad student, he balanced his academic commitments and internship's work in a responsible manner. I'd be happy to talk more about Aakarsh for any query that you might have before hiring or admitting him in your prestigious organization/institution.

We wish him all the best for his future endeavors and a successful career ahead.

Cheers!
